DETAILED ACTION

Application Status

1. By virtue of a preliminary amendment filed on 11/24/2003, claims 1-9 have been canceled; and claims 10-18 have been amended. Thus, claims 10-18 are pending in the instant application.

Election of Species

2. This application contains claims directed to the following patentably distinct species of point mutations in claimed inventions: in Claims 10-18, each of the point mutations from the first set of residues ("Met57Leu --- and Thr238Ala" from Claim 10) are distinct species. In addition to the point mutations above, each mutation chosen from second set of residues indicated by amino acid positions ("2,17 --- and 246" from Claim 10) are distinct species.

These species are related because they are all mutant kanamycin nucleotidyltransferase encoded from a gene sequence of SEQ ID No: 1. However, the related species are distinct because they do not overlap in scope and are not obvious variants. For example, each gene encoding a mutant has distinct nucleic acid sequence. Each gene product mutant protein is made up of different amino acid sequences thus chemically distinct. Each mutant protein has to be prepared separately from each other. Therefore, species are distinct evidenced by reasons above. In addition to their distinctness, the search of each mutant gene require separate

sequence search in the database, thus searching all species of claims 10-18 together would impose a serious search burden on the examination process.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (a single mutation from 1st and a single mutation from 2nd set of residues) and for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim in the instant claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Election

AK 3A. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
